

Bylandt dikformaat

De meest toegepaste steen is de vormbak dikformaat. Vormbakstenen zijn minder strak dat strengpersstenen en geven een natuurlijk straatbeeld.

Straatbakstenen van Bylandt worden geproduceerd in Tolkamer en worden geleverd onder DUBOkeur. Uiteraard is de dikformaat prima te combineren met waal- en keiformaten, de nieuwe Linge-formaten of met andere materialen.

- zowel handmatig als machinaal verlegbaar
- prima te combineren met strengpers dikformaten
- leverbaar in diverse kleuren (bezand en onbezand)
- kwaliteit A4-12 EQ+ (5 mm maattolerantie)
- zonder vellingkant
